OUR PROMISE IS YOU  
WILL BE PAID FOR  
EVERY KILO, EVERY  
TIME, AT A FAIR PRICE.

A CHANGING OF THE GUARD 4

WHY YOU SHOULD USE US 5

WHAT CAN WE DO FOR YOU? 6

WHY OUR PROCESS IS  
GOOD FOR THE PLANET 7

WE ARE BETTER PLACE TO DO BUSINESS 7

# A CHANGING OF THE GUARD

In an industry that often undervalues its customers, we are re-engineering an approach that not only ensures our customers feel welcome and their product valued but know they will ALWAYS receive a fair price for their product.

**It is our promise.**

## **Delivering outcomes that matter**

We know this is easy to say, but we like to believe we apply this every day with every transaction we make. Our business exists because of customers, not the other way around.

# WHY YOU SHOULD USE US

- We know you have a choice of metal recyclers, and we never denigrate the competition.

## We don't need to.

With more than 20+ years' operating in a highly competitive industry with clients from SMEs to multinationals, we always engage a set of steps and processes that are often overlooked in the industry – yet are standard operating procedure for us.

- Scrap Metal Prices updated daily
- On Site Demolition Services
- Bins, Tippers, Semi-Tippers
- 60 Tonne Weighbridge at Yard
- Free collection of scrap metal (minimum quantities apply)
- We buy steel, copper, cable, brass, aluminium, stainless steel lead, batteries, zinc and much more
- Recycling Lock In Price Contracts available
- Comprehensive Payment and Records systems
- We value and respect our customers
- We value their product
- We are transparent in our business dealings
- We always pay competitive prices
- We use certified equipment – for example, our weighbridge - to ensure outcome certainty
- We engage expert metal graders to ensure product value is being met every time

**This may seem a simple formula, but it builds confidence, assurance and indeed, certainty for our customers bringing them back time and time again.**

# WHAT CAN WE DO FOR YOU?

Scrap recycling can be daunting for many, so we offer end-to-end services from free scrap pick up to free certified destruction certificates. Our goal is always make the process as seamless as possible.

## Size is never an issue

Whether by the truck load or part of a national contract, we can not only manage this size diversity, but we treat each with the same level of transparency and respect.

This is a key point of differentiation for our business.

We are not only proud of what we do but also the way we do it. Our dedicated team is highly skilled, and thoroughly professional and committed to industries best practice. We pride ourselves on being welcoming, helpful, and transparent and we share our knowledge with our customers to ensure they can always maximize the value of their product.

## WHY OUR PROCESS IS GOOD FOR THE PLANET

- We all know about the benefits of recycling. What is often not known is that metal is the world's most recycled material.

Indeed, scrap metals can be recycled and used again for an indefinite period, meaning we protect and preserve some of nature's most limited resources.

Of course, recycling is undertaken for both economic and environmental reasons, however, it is always cheaper and more environmentally sound to recycle steel than to mine virgin ore and move it through the process of making new metals.

As one of Sydney's recognised leaders in eco-efficient practices, we are extremely proud of the small part we play in the planet's future.

### **Process and technology**

Our operation is one of Sydney's most advanced in regard to the processes we engage and the technology we use. This always results in better customer outcomes.

## WE ARE A BETTER PLACE TO DO BUSINESS

Quite simply, we ARE a better place to do business. If this is your first time or you are a seasoned multi-national that requires detailed SLA's or contract arrangements, Top Dollar Metal Recyclers is well worth your careful consideration.
